

BUSINESS: FORT BENNING US ARMY POST
CATEGORY: MILITARY
LOCATION: FORT BENNING, GA
SQUARE FOOTAGE: 380,700
CONSTRUCTION TYPE: BUTLER BUILDING SYSTEM

PROJECT SUMMARY

In 2008, Rainwater Construction Company was contracted by BlueScope Construction to be the building erection partner for several new buildings at the Fort Benning US Army Post in Fort Benning, Georgia. Fort Benning is home to multiple military schools and tenant units and supports the activities of more than 120,000 people per day. The project included a new battalion headquarters and five new two-story trainee barracks for the newly developed US Army Maneuver Center of Excellence, which combined Fort Benning's infantry school with the relocated armor school from Fort Knox, KY.

PROJECT SCOPE

- (5) Two-Story Barracks Totaling 339,500 Square Feet
- 41,200 Square-Foot Battalion Headquarters
- Butler MR-24® Roof
- Butler Texture Wall Panel System
- Shadowall™ Wall System

"We were honored to be selected as BlueScope's construction partner for the Fort Benning expansion. It was such a great opportunity to work with the Army Corp of Engineers and gain the kind of experience and expertise that only comes with working on a US military base." - Ben Rainwater, Rainwater Construction
