## **Rainwater Construction Company Achieves AC478 Accreditation**

Bethlehem, PA - [www.MBCEA.org](http://www.MBCEA.org) - The Metal Building Contractors and Erectors Association (MBCEA) announces that Rainwater Construction Company headquartered in Atlanta, Georgia and servicing the Eastern United States, now holds the prestigious AC478 accreditation administered by the International Accreditation Service (IAS). AC478, Accreditation for Metal Building Assemblers Inspection, is a standard to recognize metal building assemblers committed to excellence.

Achieving this accreditation demonstrates that Rainwater Construction Company has the personnel, the organizational skills, vast experience, knowledge, management procedures, and commitment to assemble metal buildings in accordance with code, specifications, costs and deadlines. Requirements for this accreditation include documented management systems, rigorous safety training, quality managers, OSHA training, documented safety plans, site-specific plans, and other documentation.

“Congratulations to Rainwater Construction on achieving your AC478 accreditation—a milestone that reflects your unwavering commitment to integrity, respect, and quality,” states Robert Tiffin, MBCEA President. “This recognition affirms what your clients already know: that you build more than structures—you build trust, growth, and lasting partnerships with every project.”

For nearly seventy years, Rainwater Construction has been dedicated to building with integrity, safety, and precision—and the AC478 accreditation affirms that commitment. Earning this accreditation not only acknowledges Rainwater’s expertise in assembling metal building systems at the highest industry standards, it also exemplifies Rainwater’s unwavering focus on safety throughout every project. More than a certification, this achievement reflects the work of each and every member of the Rainwater team to safely and dependably deliver best-in-class construction.

“This recognition is especially meaningful to us because it validates the standards we’ve developed and maintained since opening our doors in 1956,” said Rainwater President Steven Hudgins. “To be recognized for excellence always feels good – but to be recognized for excellence by one of the most respected accreditation bodies in the commercial construction industry – that’s an honor showing we’re really doing something great here.”

**About Rainwater Construction Company:** Rainwater Construction Company is a self-performing steel erector and turnkey building partner, serving the Atlanta metro area and beyond. With seven decades in operation, Rainwater has one of the longest-standing partnerships with PEMB provider Butler Manufacturing. As a relationships-first company, our mission is to support businesses by providing them with best-in-class construction and workmanship on buildings that withstand the test of time. Our portfolio includes work for schools, churches, the US military, and private industry. Find out more at: <https://www.rainwaterconstruction.com/>.

**About The MBCEA:** The MBCEA was formed in 1968 to serve the needs and support the interests of metal building contractors and erectors. It has 3 main goals:

- Education: To provide programs and venues that enhance education opportunities for metal building contractors and erectors.
- Image Enhancement: To develop programs to enhance the image of metal building contractors and erectors, and the metal building industry.
- Grassroots Support: To develop and maintain programs specifically designed to support and respond to the needs of the grassroots membership of the MBCEA.

The association proudly boasts membership from virtually every aspect of the industry and all 50 States and Canada. For additional information please visit our website at [www.mbcea.org](http://www.mbcea.org) or contact Sasha Demyan at 484-239-3337.
